Dear Marketing Manager,

Squantum Association is a members only organization, serving private social and corporate events.

We are extremely pleased with your product, Biotabs.

Since using your Biotabs, the grease in the pump stations has disappeared, thereby increasing tank capacity and eliminating odors and the need to manually clean the stations.

We have two pump stations on our property that required frequent cleaning, plus some line cleanings, at least twice per year.

As preventative maintenance, we had the sewer lines cleaned and found them to be much improved.

Needless to say, we are so pleased we will continue to use Biotabs.

Sincerely,

John Hollinrake
Facilities Manager
